

HCD0130821 — clinical review recommended — T2 hyper-intensity, could be mucous — **Include** w/ flag
age 14

HCD0203620 – large pineal cyst & T2 signal changes, possible previous hemorrhage; follow-up required – **Include w/ flag**
age 21

HCD0236130 – cavernous malformation – follow-up recommended - **Include w/ flag**
age 17

HCD1007423 – possible "Multinodular and vacuolating neuronal tumor" (MVNT); typically benign & nonaggressive but sometimes associated with seizure episodes; follow-up clinical review needed – **Include w/ flag**
age 8

HCD1106728 – arachnoid cyst anterior/medial L temporal lobe – **Include** w/ flag

age 14

HCD1464653 – pineal region cyst – **Include** w/ flag

age 14

HCD1992375 – Not convincingly just VR spaces. Should have diagnostic MRI. May need contrast. – follow-up recommended -

Include w/ flag

age 15

HCD2400026 – wm atypicalities found during surface QC – "Multinodular and vacuolating neuronal tumor" (MVNT)

Include w/ flag – age 14

HCD2496570 – small arachnoid cyst anterior L temporal lobe – **Include w/ flag**
age 17

HCD2568670 – clinical review recommended – no further info – T1&T2 hyper-intensity – Include w/ flag
age 14

HCD2926973 – cerebellar tonsillar herniation – follow-up recommended; **Include** w/ flag
age 8

HCD2926973 – cerebellar tonsillar herniation – follow-up recommended; **Include** w/ flag
age 8

HCD0574756 – NOT YET RELEASED pineal region cyst; follow-up recommended – Include w/ flag

age 15

HCD1515644 – NOT YET RELEASED small cavernoma; report to subject – Include w/ flag
age 13

HCD1859474 – **NOT YET RELEASED** clinical review recommended – no further info – T2 hyper-intensity in med/frontal lobe – **Include** w/ flag

HCD2544757 – NOT YET RELEASED prominent VR spaces - Include w/ flag
age 8
